There is more to a safety program than just compliance.

Course Overview

Although compliance with OSHA Regulations is a requirement and a best business practice, there is more to a safety program than just compliance. This course will explore how to advance a safety and health program including management techniques that show leadership for safety and health programs and how to motivate employees to become involved in the safety and health efforts. Additionally, the course will outline better ways to identify hazards, what makes safety and health training most effective and how to evaluate safety and health program success or identify areas requiring improvement. Finally, we will discuss the best ways to communicate and coordinate safety efforts between host employers, contractors and staffing agencies.

Faculty

HAROLD GRIBOW, MS, CSP, ARM, ALCM

Harold Gribow is a safety consultant and a faculty member and Curriculum Manager for the OSHA Training Institute Education Center at the University of California, San Diego. He holds a master’s degree in safety management, and is a Certified Safety Professional (CSP). He has earned Associate in Risk Management (ARM) and Associate in Loss Control Management (ALCM) certifications.

Harold is a Professional Member of the American Society of Safety Engineers (ASSE), a past president of the Arizona Chapter. He was honored as the Safety Professional of the Year by the ASSE Arizona Chapter in 2004.
Learning Objectives
At the end of the training participants will be able to:

- Apply best practices for management leadership for effective safety and health programs
- Practice methods to motivate workers to voluntarily participate in the safety and health program
- Implement techniques for hazard identification, assessment, prevention and/or control
- Describe effective safety and health education and training
- Evaluate the success of a safety and health program

Who We Are
The Southern California Education and Research Center is a NIOSH (National Institute for Occupational Safety and Health) ERC. It is one of 18 ERCS at major universities whose goal is to train occupational health and safety professionals, provide them with professional development, and train non-professionals in occupational health and safety best practices. It is located in the Fielding School of Public Health at the University of California, Los Angeles, and includes the Center for Occupational and Environmental Medicine at UC Irvine School of Medicine, the Occupational and Environmental Health Nursing Program at the UCLA School of Nursing and the Industrial Hygiene Program at UCLA.
