Southern California Education and
Research Center

Workplace Violence Prevention Basics - Morning Day 1 morning How to Develop Your Workplace Violence Prevention Plan: Complying with Cal/OSHA - Day 1 afternoon Train-the-Trainer in Your Workplace Violence Prevention Plan - Day 2

Course Overview

- According to OSHA -- “Workers in hospitals, nursing homes, and other healthcare settings face significant risks of workplace violence. Many factors contribute to this risk, including working directly with people who have a history of violence or who may be delirious or under the influence of drugs. From 2002 to 2013, the rate of serious workplace violence incidents (those requiring days off for an injured worker to recuperate) was more than four times greater in healthcare than in private industry on average. In fact, healthcare accounts for nearly as many serious violent injuries as all other industries combined. Many more assaults or threats go unreported. Workplace violence comes at a high cost; however, it can be prevented. .”
- Cal/OSHA issued a new standard in 2017, Title 8 § 3342, Violence Prevention in Healthcare. It went into effect in April 2017.
- **The new standard requires that employers in healthcare facilities develop a Workplace Violence Prevention Plan and train all employees in the Plan by April 2018.**

What Healthcare Facilities Are Included?

- General acute care hospitals
- Acute psychiatric hospitals,
- Skilled nursing facilities,
- Intermediate care facilities including , developmentally disabled , developmentally disabled-habilitative, developmentally disabled-nursing, and developmentally disabled-continuous nursing)

Workplace Violence Prevention in Healthcare

Who Should Attend

All personnel involved in the development of the organization's Workplace Violence Prevention Plan; all those involved in training employees in the organization's Workplace Violence Prevention Plan; labor representatives.

Learning Objectives - Day 1

At the end of the training participants will be able to:

- Describe the Cal/OSHA elements required for an effective Workplace Violence Prevention Plan;
- Choose among effective procedures to obtain the active involvement of employees and their representatives in developing, implementing and reviewing the Plan;
- Develop methods for coordinating implementation of the Plan with other employers whose employees work in the same healthcare facility, service or operation;
- Establish other effective procedures for your Workplace Violence Prevention Plan as required by Cal/OSHA.
- Prepare to implement the requirements for additional employee training beyond initial training.

Learning Objectives - Day 2

- Develop a program to train your employees so they are knowledgeable about your Workplace Violence Prevention Plan.
