The Southern California Education and Research Center is one of 18 multidisciplinary centers supported by NIOSH (National Institute for Occupational Safety and Health) for education and research to protect the safety and health of US workers. The SCERC is administratively housed in the Department of Environmental Health Sciences, UCLA School of Public Health. Continuing Education and Outreach programs provide short courses and conferences, and conduct on-site training and online webinars. Course directors and instructors are drawn from academia, private industry, and government agencies. In addition to providing conventional continuing education for professionals, the Program obtains grants to provide vulnerable low-wage workers with the benefits of occupational health and safety training at no cost.

Through Continuing Education/Outreach, the Southern California Education and Research Center (SCERC) reaches out to all levels of management within business and industry, to leaders in government, to other academic institutions, and to workers to increase their awareness of workplace health and safety issues and safe work practices.

Short-term training represents the expressed needs and interests of practicing occupational health and safety specialists, management and labor representatives. Courses are designed around the concept of a systematic approach to health and safety education — integrating occupational and environmental health and safety into the business process. Courses are approved for professional continuing education credit appropriate to each discipline.

FAQ'S

Where is the class? How do I get there? Where do I park?
Most courses are held at UCLA, in Westwood Village, near Downtown Los Angeles, and Anaheim. Prior to the class, you will be sent details of your class location along with a map, and driving, parking and walking instructions.

What are your payment terms?
For courses for which registration fees are paid to the SCERC through UC Regents.
Substitutions may be made without additional charge. Cancellations must be in writing.

Refund schedule:
Cancellation 15 or more business days before the class - 80% of registration fee
Cancellation 7-14 business days before the class - 50% of registration fee
Cancellation less than 7 days before the class and "no shows" - No refund
If course materials such as books have been sent to course participants in advance, the cost of that material will be subtracted from the refund.
UCLA reserves the right to postpone an offering 7 days prior to the course date should minimum enrollment requirements not be met. If a program is canceled, you will be notified and your registration fee will be refunded in full, less the cost of course materials sent in advance if they are not returned in the condition in which they were received.
The liability of UCLA is limited to the course fee.
For courses for which registration fees are paid to our co-course sponsor: please consult the co-sponsor for their payment terms.

What is included in the registration fee?
The registration fee includes all required course material for most courses.
A small number of courses require that you purchase additional course material.
Please look for what is included for each class on the course webpage.

What Accreditation is available?
Please consult the Accreditation section on the webpage or flier for each course.
Most courses are approved for BCSP COC points and CE points, and are eligible for:
ABIH (American Board of Industrial Hygiene) IH or Safety CM credits (see ABIH web site for CM credit criteria).
Where appropriate, Contact Hours from the Board of Registered Nurses (BRN) and for REHS (Registered Environmental Health Specialists) are available.
The Southern California Education and Research Center is an Accrediting Agency for REHS continuing education, approved by the California Department of Public Health.
The SCERC is also approved by the California Board of Registered Nursing, Provider #13555.
CME -- The Southern California Education and Research Center is accredited by the Institute for Medical Quality/California Medical Association (IMQ/CMA) to provide continuing medical education for physicians.
A limited number of courses are eligible for CME.
See individual course pages for course credits.
Participants must attend at least 90% of the time to receive credit.
In case of a course requiring computer access, please refer to the course flier.
George Brogmus is responsible for the technical quality of ergonomic consulting services for the Pacific Southwest region of Liberty Mutual. Formerly a Senior Research Associate at the Liberty Mutual Research Institute for Safety, he has published peer-reviewed research articles on ergonomic measurement systems, lifting technique, repetitive motion injuries, occupational stress and the impact of work scheduling on injury risk.

Eugene Goldfarb is an Adjunct Asst Professor in Environmental & Occupational Health Sciences School of Public Health at the University of Illinois at Chicago.

Harold Gribow is a safety consultant and a faculty member and Director of General Industry Programs for the OSHA Training Institute at the University of California, San Diego. Harold is a Professional Member of the American Society of Safety Engineers (ASSE), a past president of the Arizona Chapter, and recently completed a four-year term as Director of Area A within Region II of the Society.

President, Annette B. Haag and Associates, past President of the American Association of Occupational Health Nurses. With over 40 years of experience, she is nationally and internationally recognized in the field of health and safety.

Gary spent 22 years in the petroleum industry as a Safety Inspector, Manager of Loss Control Programs, and Company Trainer for Regulatory Compliance and Safety Management Systems. He has extensive experience in developing training and operating manuals, policies, procedures, incentive programs, and conducting motivational and participatory safety training.
Robert N. Phalen is a Certified Industrial Hygienist and holds a doctorate in environmental health sciences with specialization in industrial hygiene from UCLA. Dr. Phalen’s background includes over ten years experience in the practice of industrial hygiene, occupational safety, ergonomics and environmental health. He is an Associate Professor of Industrial Hygiene at University of Houston-Clear Lake.

John currently serves as the Director of Environmental, Safety Health and Risk Management for the University of California Santa Barbara. In addition, he currently serves as an instructor for safety, environmental compliance and risk management courses at the University of California of Los Angeles, University of California San Diego and California State University Dominguez Hills.

Dr. Thomas is an Assistant Professor in the Occupational and Environmental Health Nursing Program, UCLA School of Nursing. She has 20+ years of experience as an Occupational Health Nurse Practitioner and has designed, implemented, and managed numerous occupational health programs, including award winning workers’ compensation and ergonomics programs.

Mr. Unmack has more than 40 years of experience in environmental health and safety with federal and state governments, private practice and industry. Jim has authored more than 20 publications, including the California Division of Occupational Safety and health Industrial Hygiene Technical Manual. He is president of Unmack Corporation, a fellow of the American Industrial Hygiene Association and a diplomate of the American Academy of Environmental Engineering.

Alba M. Vazquez is an OSHA Authorized Outreach Trainer in Construction and General Industry, Author, Medical Compliance Specialist and Professional Speaker. Some of the clients she has provided training for include: Hallmark, PG&E, Cedars Sinai Medical Center, Kaiser Permanente, IHOP, Dow Chemical, Goodwill, City of Los Angeles, and many others.

Mr. Warner was EHS Program Manager, Metropolitan Water District. Previous to his position at MWD, he was Safety Manager, Disneyland Resort. Previous to Disneyland Resort, Mr. Warner was Industrial Hygiene Manager at Southern California Edison where he was responsible for management and oversight of all phases of the corporate environmental health and safety programs, including development of policy for environmental health and safety issues. He also worked as both a consulting and compliance IH for Cal OSHA.
EARN YOUR NIOSH/ERC WORKPLACE SAFETY AND HEALTH PROFESSIONAL CERTIFICATE

Enhance your career | Expand your horizons | Contribute to a safer workplace

Benefits of Certificate Candidacy

Professional certificate from a NIOSH (National Institute for Occupational Safety and Health) Education and Research Center hosted at the UCLA School of Public Health

Guaranteed lowest registration fee for any class (as long as you register no less than 10 days prior to first day of class)

Eligible for available scholarship assistance

This comprehensive program provides certificate candidates with a thorough understanding of the challenges of workplace safety and health and the knowledge to be able to mitigate and/or overcome them. The curriculum includes core requirements and electives that allow participants to design the program best suited to their needs.

Though there are no educational requirements to enter the program, some classes require math and/or science knowledge and/or skills. Participants must also have professional level English language proficiency in reading comprehension, vocabulary, written expression and oral presentation.

Candidates must attend all sessions and pass written exams to receive credit towards the SCERC Workplace Safety and Health Professional Certificate.

Most courses completed through the SCERC/UCSD OSHA Training Institute Ed Center partnership are eligible to substitute for Core Required Courses or Electives in the SCERC Workplace Safety and Health Professional Certificate. Courses completed through other professional certificate programs will be considered for credit on a case-by-case basis.

Certificate Program Details Online: erc.ucla.edu/certificate-program

Enrollment Fee:
Fee to Enroll as a Candidate for any Workplace Safety and Health Professional Certificate — $150

(You will be eligible for the discounted Certificate Candidate fee for all required and elective classes)
Make plans to join us as we return for our fourth annual EHSSENTIALS symposium at UCLA in Los Angeles.

Early registration, as well as calls for presentations and posters, will be available very soon.

Sign up to receive event announcements or submit any questions to infosc@ehssentials.com.

Early Bird: $849 (ends 01/24/2020)  
Standard Fee: $999  

https://erc.ucla.edu/course/osea/

**Train-the-Trainer**

Faculty: Gary Kelley, MS  
Early Bird (ends 02/28/2020): $299  
Standard Fee: $479  

https://erc.ucla.edu/course/t-the-t/

**Safety Management**

Faculty: Harold Gribow, MS, CSP, ARM, ALCM  
Early Bird (ends 03/27/2020): $199  
Standard Fee: $249  

https://erc.ucla.edu/course/safetymgmt/

**February 25-27th | 8am-4:30pm | Location: Anaheim**

Participants will learn how to understand and interpret OSHA required safety programs but also will learn important safety fundamentals as well as advanced and necessary safety skills and techniques.

**March 23-27 | 8am-4:30pm | Location: UCLA**

For Agency or consultant staff with environmental assessment responsibilities, local government staff working on Federal programs; development professionals, members of the public wanting to comment and influence Federally-funded projects. This course limits class size and uses interactive exercises to facilitate individual instruction. It also features many expert guest speakers and a field trip.

**March 30-31 | 8am-5pm | Location: Anaheim**

The aim of this course is to prepare you to communicate health and safety or any other kind of training to your target audience, however large or small. Significant class time is devoted to practice, role playing, and feedback including videotaping and replay.

**April 27 | 8am-5pm | Location: Los Angeles**

This course will explore how to advance a safety and health program including management techniques that show leadership for safety and health programs and how to motivate employees to become involved in the safety and health efforts.
Risk Management

April 28 | 8am-5pm | Location: Los Angeles

This course will cover some of the more important risk management practices that control many of the exposures to loss that a business may face. Some of these are net income losses, losses from property damage like fire and theft, and losses that result from poor publicity related to negligent behavior and environmental impacts.

https://erc.ucla.edu/course/riskmgmt/

Fleet & Vehicle Safety (morning)

April 29 | 8am-12pm | Location: Los Angeles

About every twelve minutes, someone in the U.S. dies from a motor vehicle crash. Unfortunately, many of those accidents are work-related and not always isolated to open roads. Trying to prevent these fatalities is one part of motor vehicle safety, but there are a number of risk factors that need to be addressed in order to reduce the total number of accidents.

https://erc.ucla.edu/course/fleetsafety/

Workers Compensation (afternoon)

April 29 | 1pm-5pm | Location: Los Angeles

Knowledge of the workers compensation system should be understood by all safety professionals, and those who are relied upon by their employers to manage the system must be well aware of how to control the costs of the insurance premiums. This course will cover the fundamentals of the coverage requirements, options for obtaining the coverage, how premiums are calculated and how claims affect the cost and availability of continued coverage.

https://erc.ucla.edu/course/workerscomp/

Occupational Health and Safety Principles and Nursing Certification Review

June 23-25 | 8am-5pm | Location: UCLA

State-of-the-art information in the field of occupational and environmental health and safety; Comprehensive workbook/resource manuals and classroom materials; Test-taking techniques and strategies for examination preparation; Written tests prior, during, and at conclusion of seminar; Participative lectures.

Ends Thursday at 2 pm—Working lunch (provided) on Thursday

https://erc.ucla.edu/course/ohn/
Ergo Online — Monthly Ergonomics Webinar Series

Faculty: George Brogmus, MS, CPE, MIEHF
* Some sessions may be presented by a guest speaker.

• January-Dec:
  • Individual sessions: $59 (Over the course of the year, if you attend 10 sessions at the individual session rate, you will be eligible for 2 additional sessions at no cost.)
  • Half Series (any 6 sessions): $319
  • Full Series: $599
  • Early bird ends 12/14/19 $499

Second Tuesday Every Month | 11am—12:00pm PT

The successful application of ergonomic principles lies in understanding the broad scope of ergonomics: specifically the importance of recognizing physical, cognitive, psychosocial, and organizational elements of work and the capabilities and limitations of workers. Participants will be reinforced on some of their assumptions and boldly challenged on some strongly held beliefs on how to prevent injuries. The end result will be confidence in applying ergonomics in a much more effective manner. All classes are approximately one hour — within the convenience of your home or office.

NIOSH-Approved Pulmonary Function Training
Full—2 days
Refresher—1 day

Full: March 16 & 17 | 8am - 5pm | Location: UCLA
Refresher: March 18 | 8am - 5pm | Location: UCLA

Participants in this course learn spirometry techniques that are approved by NIOSH and the American Thoracic Society. They become familiar with applicable OSHA standards, ATS recommendations and NIOSH guidelines. Basic pulmonary anatomy and physiology, FVC, FEV1 and FEV1/FVC calculations are taught. Various types of spirometers are represented and the advantages and disadvantages of each are addressed. This course consists of lecture and supervised practicum. Instructor-student ratios ensure many opportunities for individualized instruction.

GOALS
Accurately perform manual audiometric testing. Identify an invalid test and calculate standard threshold shifts. Identify various types of audiometers and know the advantages and disadvantages of each. Identify applicable OSHA standards, laws and regulations. Be CAOHC approved and certified.

Occupational Hearing Conservation Training
Full—2 days
Refresher—1 day
CAOHC Approved

Full: March 18-20 | 8am - 5pm | Location: UCLA
Refresher: March 19 | 8am - 5pm | Location: UCLA

Participants in this course become familiar with all aspects of occupational hearing conservation programs, including noise measurement and control, anatomy and physiology of the auditory system, hearing protection and employee education. OSHA standards, worker’s compensation and other state and federal regulations are discussed. Students participate in hands-on manual hearing testing under the supervision of experienced practicum instructors. They learn to identify standard threshold shifts and audiograms that may require follow-up. Different types and brands of equipment are represented to familiarize the participant with the various equipment options available. After successful completion of the course, the participant is eligible to apply for CAOHC certification or recertification.

GOALS
Accurately perform manual audiometric testing. Identify an invalid test and calculate standard threshold shifts. Identify various types of audiometers and know the advantages and disadvantages of each. Identify applicable OSHA standards, laws and regulations. Be CAOHC approved and certified.

OSHA COURSES

**OSHA 5029- Cal/OSHA Update for Construction Industry Outreach Trainers**

*June 4 | LA VDK*

Developed in partnership with Cal/OSHA, this 4-day course emphasizes Title 8 Construction Industry standards and compliance. Topics include IIPP, Ergo, Electrical and many others.

**OSHA 5109- Cal/OSHA Standards for the Construction Industry**

*June 8-11 | Anaheim*

This course covers OSHA Standards, policies, and procedures in general industry. Topics include scope and application of the OSHA General Industry Standards, general industry principles and special emphasis on those areas in general industry which are most hazardous.

**OSHA 510- Occupational Safety and Health Standards for the Construction Industry**

*July 13-16 | LA VDK*

Developed in partnership with Cal/OSHA, this 4-day course emphasizes Title 8 General Industry standards and compliance. Topics include IIPP, Ergo, Electrical and many others.

**OSHA 500- Trainer Course in Occupational Safety and Health Standards for the Construction Industry**

*August 10-13 | LA VDK*

This course covers industrial hygiene practices and related OSHA regulations and procedures. Course topics include recognition, evaluation, and control of chemical, physical, biological and ergonomic hazards, Permissible Exposure Limits (PEL), OSHA health standards, respiratory protection, engineering controls, OSHA sampling protocols and strategies, and workplace health program elements.
